

CHAD PETERSEN

Profile

I began as a freelance developer in 2009. I started creating brochure websites for people I knew or companies I found to be interesting. Currently I work in the health care industry, building and maintaining web applications for authenticated members of the insurance company. These applications are multi-branded, multi-homed code bases that are dynamic, responsive, scalable and accessible. Turning complex problems into simple, beautiful and intuitive applications is something that I enjoy. I have a strong passion for clean and reusable code along with a need to create a great user experience.

When I'm not coding, I enjoy the outdoors as much as possible. Fly fishing, kayaking, camping, snowboarding, hiking and travel are all of interest to me.

Experience

Web developer, Health Partners; Bloomington, MN — 2011-Present

Developing fully functional responsive sites and pages based on business requirements using HTML/HTML5, CSS3, JavaScript, JQuery, React, Web pack, SASS and Bootstrap 3.

Owner, developer, designer; Studio Nine Sixteen — 2009-2012

Freelance consultant and developer. I specialized in creating brochure sites for various small companies. Clients consisted of small businesses that were ran by various connections. The fields of interest were taxes, construction, landscaping, property listings and auto care.

Template developer, Tenenz Inc; Bloomington, MN — Oct. 2010-Dec.2011

Contract developer role. Designed and implemented templates for an in house build CMS system. Using HTML, CSS and javascript. The company offered a CMS service for tax prepares who wanted a web presence.

Developer, Advertising Assurance; Burnsville, MN — 9 month contract 2010

Created sites, forms and all the annoying things that a lead generation company is after. The company was a lead generator for online colleges. HTML, CSS and JQuery were the common languages used.
