

CHAD PETERSEN

Front-End Engineer | Web Application Engineer

Chaska, MN • 952-465-7501 • chadptrsn@gmail.com • [Portfolio](#) • [Github](#)

PROFESSIONAL SUMMARY

Front-end engineer with 15+ years of experience designing, coding, and building scalable web applications, including the modernization of enterprise healthcare platforms. Experienced in designing and developing micro frontend applications using Vue, Nuxt, and TypeScript, with a focus on technical architecture, reusable design patterns, web performance, accessibility, and maintainable code.

Collaborative engineer who works closely with backend, UX, product, and QA teams to solve complex problems, establish development best practices, and deliver intuitive user experiences. Experienced in providing technical leadership through architecture discussions, code reviews, mentoring, and front-end engineering decisions.

CORE TECHNOLOGIES

- **Languages/Frameworks**

- TypeScript, JavaScript (ES6+), HTML5, CSS3, VueJS, Nuxt, React

- **Architecture**

- Micro Frontends, UI architecture, State Management, Design Patterns, REST APIs, Component Libraries, Responsive Design, Accessibility (WCAG), Web Performance

- **Platform/Tools**

- OpenShift, GitHub, GitHub Actions, Cypress, Vitest, Agile/Scrum

PROFESSIONAL EXPERIENCE

Web Application Engineer

HealthPartners | Bloomington, MN | 2011–Present

- Modernized a legacy Java-based patient scheduling platform by helping define and implement a micro frontend architecture using Vue, Nuxt, and TypeScript.
- Designed and developed consumer-facing public and authenticated scheduling experiences that allow patients to search for providers, schedule appointments, and manage healthcare visits.
- Applied front-end design patterns and coding best practices to create clean, maintainable, reusable components across micro frontend applications integrated with Spring Boot REST APIs and JSON services.
- Helped define the technical communication and state-management model between micro frontends and a centralized orchestration service, allowing independent applications to maintain local state while synchronizing workflow data through a shared source of truth.
- Collaborated with backend engineers, UX designers, product owners, QA, and other developers to translate product requirements and designs into maintainable, accessible user experiences.
- Translated UX designs into responsive, accessible interfaces using an internal web component library, with a focus on usability, performance optimization, and WCAG compliance all while maintaining visual consistency across applications.

- Owned front-end implementation of features from UX designs through development, testing and delivery.
- Provided technical leadership through architecture discussions, design decisions, code reviews, mentoring, and evaluation of technical trade-offs and front-end best practices within a five-developer engineering team.
- Applied GitHub, GitHub Actions, OpenShift, and Agile development practices to support coding, testing, and delivery across multiple environments.
- Contributed to automated testing using Vitest and Cypress while collaborating closely with QA engineers to improve application quality and maintainability.

Owner / Developer / Designer

Studio Nine Sixteen | 2009–2012

- Founded and operated a freelance web development business creating responsive marketing websites for small businesses across multiple industries.
- Managed projects from client discovery through design, development, deployment, and ongoing support.
- Built custom HTML, CSS, and JavaScript solutions focused on usability, performance, and responsive design.

Template Developer (Contract)

Tenenz Inc. | 2010–2011

- Developed reusable website templates for a proprietary content management system used by tax professionals.

- Worked with HTML, CSS, and JavaScript to deliver customizable client websites.

Front-End Developer (Contract)

Advertising Assurance | 2010

- Developed landing pages, lead-generation forms, and marketing websites using HTML, CSS, and JavaScript.
- Collaborated with designers and marketers to rapidly deliver client campaigns.

EDUCATION

South Central College

Associate of Arts – Information Systems
2009
